

SkyVision Hybrid II Digital System

powered by

GDM

***The Industry's 1st Fully Fiber
Optic Digital Technology Platform!***

SkyVision's Hybrid II Digital Integration System takes OR Integration to a whole new level of flexibility and digital technology innovation! It is the first all fiber optic based system on the market.

SkyVision Hybrid II's fully digital system protects investment dollars while optimizing clinical use, workflows and efficiency for 'plug and play' technologies that remain continuously adaptable to changes whenever you are!

Intuitive Interface

Provides central control of O.R. workflow
