**Re: Testimonial - Meditek**

As a Project Manager on the Grande Prairie Regional Hospital project, I had the pleasure of working closely with Meditek on Skytron Booms for Ambulatory Care, and Skytron Booms and Integration at nine new Operating Rooms. Meditek was engaged under Alberta Health Services for the project.

The Meditek team is proactive and organized. Meditek actively participated in various meetings and site reviews to ensure their scope was coordinated correctly with the design team, site team, and contractor-connect trade partners. Meditek's installation team completed a complicated scope on schedule, while also adhering to safety, quality, and IP&C requirements.

Based on Meditek's successful installation at the Grande Prairie Regional Hospital project, I recommend their services for other healthcare projects.

Sincerely,

**Katie MacLeod**, Project Manager
